

# Australasian Aquaculture 2010: Conference Theme

**keeping pace with change**

National  
Aquaculture  
Council

**Australian Government**  
Fisheries Research and  
Development Corporation

## Australasian Aquaculture 2010 International Conference and Trade Show

23–26 May 2010

Hotel Grand Chancellor  
Hobart, Tasmania, Australia

***change: to give a different position, course, or direction to***

The 2010 event will focus on “keeping pace with change”...whether that be economical, technological or environmental change. The 2010 Program will offer challenging presentations around this central theme allowing for both theoretical and practical exploration of the topic.

In order for aquaculture to continue to evolve in the context of changing paradigms of development - as we move further into the new millennium; there has to be adequate emphasis given to the role that ‘change’ plays in our lives, both on a personal level and within the business environment.

The 2010 presenters, including International and local experts in their fields, will address these issues as together we endeavour to keep pace with change.

The Executive Committee of the 2010 event is dedicated to offering you more than ever before...a fresh focus, increased incentives, together with more networking opportunities. **Expect to see some ‘change’ at our 2010 event.**
